

Indian Subcontinent Regional Detail & Mobility Network

Dense regional planning zones, metro service areas, and subcontinental corridor structure

This is the most zoomable project in the suite, with a finer analytical grid than the continental maps.
Mobility zones are derived from metro clustering, corridor reach, and country-level density and pressure signals.
Bookmarks jump into Delhi NCR, Mumbai Ahmedabad, Southern Tech Belt, and the Dhaka delta frame.

Layer Stack

Base Geography

Regional Context

Indian Subcontinent Countries

- Lower Density
- Moderate Density
- High Density
- Very High Density

Detailed Zones

Mobility & Service Zones

- Mobility Core
- Expansion Belt
- Detailed Watch

Metro Service Areas

- Primary Service Area
- Secondary Service Area
- Regional Area

Networks

Regional Corridors

- Industrial Corridor
- Freight Corridor
- Manufacturing Belt
- Technology Corridor
- National Spine
- Cross-Border Link
- Regional Connector
- Delta Trade Spine
- Maritime Connector

Major Metros

- Primary Metro
- Secondary Metro
- Regional Metro
