

Middle East Energy, Water & Logistics Systems

Strategic hubs, corridor infrastructure, and detailed energy-water-logistics interface zones

This project emphasizes strategic infrastructure structure rather than only country choropleths. Interface zones combine logistics reach, energy-transition capacity, strategic influence, and climate exposure. Bookmarks target the Eastern Mediterranean, the Gulf core, Mesopotamia and Iran, and the Red Sea frame.

Layer Stack

Base Geography

Regional Context

Middle East Focus Countries

- Lower Transition Readiness
- Emerging Readiness
- Strong Readiness
- High Readiness

Analytical Zones

Energy, Water and Logistics Zones

- Energy Core
- Logistics Belt
- Water-Stress Interface

Strategic Hub Areas

- Primary Strategic Area
- Secondary Strategic Area
- Regional Area

Networks

Energy and Logistics Corridors

- Northern Crescent Corridor
- Plateau Spine
- Waterway Spine
- Red Sea Logistics Spine
- Gulf Interior Corridor
- Gulf Logistics Arc
- Gulf Maritime Arc
- Maritime Connector
- Energy and Finance Arc
- Desert Interface
- Levant Interface
- Red Sea Interface

Strategic Hubs

- Primary Hub
- Secondary Hub
