

This project is the suite-wide global overview with a saved world opening extent.
Gateway spheres and corridor lines are presentation-focused analytical layers for global systems mapping.
Seven bookmarks move between Atlantic, Eurasian, Indo-Pacific, Americas, Europe-Africa, and East Asia frames without losing the global context.

Layer Stack

Base Geography

Continental Regions

Countries

- Lower Influence
- Regional Influence
- Strategic Influence
- Global Influence

Global Systems

Global Gateway Spheres

- Primary Gateway Sphere
- Secondary Gateway Sphere
- Regional Sphere

Intercontinental Corridors

- Ocean Spine
- Intercontinental Link

Global Gateways

- Primary Gateway
- Secondary Gateway
- Regional Gateway

Comparative Signals

Economic Hubs

- Regional Hub
- Major Hub
- Global Hub

Transition Leaders

- Emerging
- Accelerating
- Prime
