

Asia Growth Gateways & Supply Chains

Asian country pressure, gateway hubs, maritime arcs, and corridor-driven growth zones

The Asia project focuses on gateway structure rather than only country statistics. Supply chain zones are analytical cells scored from corridor reach, gateway clustering, and country pressure metrics. Seven bookmarks are tuned to East Asia, ASEAN, Gulf to India, Central Asia, the China coast, and the wider Indian Ocean frame.

Layer Stack

Base Geography

- Asian Countries
- Lower Pressure
 - Rising Pressure
 - High Pressure
 - Intense Pressure

Analytical Zones

- Gateway & Supply Chain Zones
- Gateway Core
 - Supply Chain Belt
 - Emerging Frontier
- Gateway Influence Areas
- Primary Gateway Area
 - Secondary Gateway Area
 - Regional Area

Networks

- Asia Growth Corridors
- Energy Spine
 - Ocean Spine
 - ASEAN Corridor
 - Maritime Corridor
 - Manufacturing Spine
 - Innovation Arc
 - Pacific Corridor

Gateway Hubs

- Primary Gateway
- Secondary Gateway
- Regional Gateway
