

Africa Gateway Trade & Resilience Systems

Continental gateway structure, trade corridors, resilience signals, and zoomable interface zones

This project balances continent-wide structure with subregional gateway detail. Analytical zones combine gateway clustering, corridor reach, resilience, and transition signals. Seven bookmarks focus on the Gulf of Guinea, Nile-Red Sea, East Africa, Southern Africa, the Maghreb, and the central mineral belt.

Layer Stack

Base Geography

Regional Context

African Countries

- Lower Resilience
- Emerging Resilience
- Strengthening Resilience
- High Resilience

Analytical Zones

Gateway Trade and Resilience Zones

- Gateway Core
- Resilience Belt
- Emerging Interface

Gateway Influence Areas

- Primary Gateway Area
- Secondary Gateway Area
- Regional Area

Networks

Africa Trade Corridors

- North Africa Arc
- Atlantic Spine
- Nile Red Sea Interface
- East Africa Spine
- Great Lakes Corridor
- Mineral Belt
- Southern Industrial Spine
- Southern Coastal Link

African Gateways

- Primary Gateway
- Secondary Gateway
- Regional Connector
