

Middle East Energy, Water & Logistics Systems

Strategic hubs, corridor infrastructure, and detailed energy-water-logistics interface zones

This project emphasizes strategic infrastructure structure rather than only country choropleths. Interface zones combine logistics reach, energy-transition capacity, strategic influence, and climate exposure. Seven bookmarks target the Eastern Mediterranean, Gulf core, Mesopotamia and Iran, Red Sea, Anatolia, and the Oman-Arabian Sea frame.

Layer Stack

Base Geography

Regional Context

Middle East Focus Countries

- Lower Transition Readiness
- Emerging Readiness
- Strong Readiness
- High Readiness

Analytical Zones

Energy, Water and Logistics Zones

- Energy Core
- Logistics Belt
- Water-Stress Interface

Strategic Hub Areas

- Primary Strategic Area
- Secondary Strategic Area
- Regional Area

Networks

Energy and Logistics Corridors

- Northern Crescent Corridor
- Plateau Spine
- Waterway Spine
- Red Sea Logistics Spine
- Gulf Interior Corridor
- Gulf Logistics Arc
- Gulf Maritime Arc
- Maritime Connector
- Energy and Finance Arc
- Desert Interface
- Levant Interface
- Red Sea Interface

Strategic Hubs

- Primary Hub
- Secondary Hub
